

## NONPROFIT CLINICAL PRACTICE

# Baby Steps THERAPY

**Baby Steps Therapy** is a 501(c)(3) nonprofit focused on helping every child achieve his or her individual potential in the classroom, at home, and in life.

Baby Steps works with children and their families who struggle with challenges that include:

- Sensory Integration and Sensory Processing Disorder (SPD)
- Autism Spectrum Disorders (ASD)
- Attention Deficit Hyperactivity Disorder (ADHD)
- Development delays
- Learning challenges and disabilities
- Language difficulties and delays
- Phonological processes and articulation disorders
- Dyspraxia (motor planning difficulties)
- Degenerative disorders
- Social skills deficits
- Apraxia
- Cerebral Palsy
- Cognitive processing

Devoted to the highest quality of care, Baby Steps therapists possess advanced training in a broad range of areas and stay abreast of the best practices in the field. Their strengths-based interdisciplinary approach to therapy helps instill parents with strategies and skills that foster continued development for their children in the home setting and integrate seamlessly with their entire family.
